

destructive past and ongoing effects of gendered and racialized settler-colonialism, land displacement, and economic dispossession, the cases we present imagine futures within those landscapes, confronting the violences enacted and engaging with their implications. Amidst the environmental destruction and calamity enacted by global hegemonies against humans and non-humans alike, we examine the precarity of our current moment in the Anthropocene through the lenses of race, gender, life, and time, and consider what might be required to build a future.
